SnakeEye™ II Video Diagnostic Tool

A general purpose, lightweight portable video inspection system with a large TFT-LCD colour monitor.

Camera technology enables crystal clear images and the SnakeEye™ is designed to function in industrial environments.

The camera head is waterproof to 30m (100 ft) and is chemical and oil resistant.

The SnakeEye™ system is manufactured from high impact, heavy duty plastic construction to withstand shock and vibration.

Camera light intensity can be set at 3 levels: low - medium - high.

A wide range of accessories are available to support the SnakeEye™ inspection system.

Specifications

Display: 127mm (5") colour TFT-LCD (640x480 pixels)

Camera: 28mm (diameter) x 48mm (length) CCD
Field of view: 45°
4 white light LED
- providing 3 levels of brightness

Sensitivity: 2 lux @ F3.5 (total pixels 771 x 492)

Power: 6V NiMH rechargeable battery
AC nominal input: 100V - 240V
DC nominal input: 12V

Operating Temperature: -10°C to 60°C (14°F to 140°F)
